

Swimming Pools

How Do GMX Products Help Swimming Pools?

A swimming pool benefits by the application of magnetic water treatment for a number of reasons:

- A pool has a circulation system and because of this circulating system installing a magnetic clamp-on device is simple.
- By fitting GMX to your swimming pool circulating system, the chlorine content can be reduced by at least 50% and chlorine odor is further reduced because much of the chlorine is incorporated into micro crystals, which we cannot smell.
- Magnetically treated water does not produce sediments on a pool's waterline.
- No hard lime scale develops in the circulation system – neither in the filter nor in the heater.
- Magnetized water extends the safe pH operating range without worry about scaling, staining or corrosion. The result is a system that protects one's investment and reduces maintenance cost.
- Magnetized water will remove build up of scum that has already attached itself to the swimming pool/Spa surfaces.
- Magnetized water eliminates severe staining at the bottom of the swimming pool/Spa.
- Magnetized water improves the performance of the swimming pool filter.

1. GMX increases the solvency in water meaning increasing the efficiency to dissolve any substance in water more efficiently.

As you will see the slide on the LEFT SIDE, electron microscopic view magnified 10X shows a sample of hard water containing minerals which are known as charged particles in water.

3. You will now see the slide on your RIGHT SIDE, above, a sample of the same water exposed to GMX magnetic waves designed to focus at an angle in a flowing/circulating water chamber. An optimum level of magnetic field causes a drastic physical change attracting the dissolved minerals to a center and keeping them in a suspended state without forming on the surface of the pipe as hard lime scale. The dark area you see is a mass of pure water without any foreign matter as it was originally created in the universe. This is SOFT WATER with a maximum SOLVENCY AND PURITY.
" Water is the greatest solvent in the world"

IF YOU HAVE NOW UNDERSTOOD THE PHYSICAL WONDER THAT HAPPENS IN WATER WITH GMX, THEN READ ALONG BELOW HOW IT HELPS DRAMATICALLY WITH MANY BENEFITS TO SWIMMING POOL OWNERS AND THOSE WHO SPEND LONG HOURS IN SWIMMING POOLS.

1. When water's solvency is efficient, you will require lesser chemicals and most importantly CHLORINE which is known to cause eye irritation (Red Eye) to swimmers. You will also have a SOFT SILKY FEELING of the water when it surrounds your body.

GMX + WATER = (LESSER CHEMICAL/CHLORINE + SOFT WATER) = (SWIMMER COMFORT AND LONGER STAY IN THE POOL WITHOUT ANY DISCOMFORT !).

2. Magnetic waves have been known to heal muscular and limb ailments for centuries. Your pool is MAGNETIZED WATER constantly circulating through powerful GMX magnetic units.
3. Because of the PURITY of the water free of murkiness, the water tends to SPARKLE in light and makes the water very desiring and inviting to be in.
4. The pool looks very Hygienic to the eye and of course it is! Because there are known algae forming on the surface of pool tiles causing the surface to have a slimy effect.
5. Running cost to maintain a pool becomes MINIMAL with all these benefits.
6. A pool with a difference is a GMX POOL.

GMX Installed on a Swimming Pool system

Attached is a picture of a home owner's swimming pool that is treated with 4 GMX Model 848s on the return line to the pool after the pump and filter. This home owner uses less than \$100.00 a year in chemicals. Here is another example of a successful GMX application in which the home owner is continually saving money.
