

Date: 22.9.2007

TO WHOMSOEVER IT MAY CONCERN

It is hereby informed that we have procured and fixed GMX Magnetic Fluid Conditioner with our Thermic Fluid heater.

This latest equipment introduced by M-5 party 9 months back and fitted with our equipment on 20.1.07.

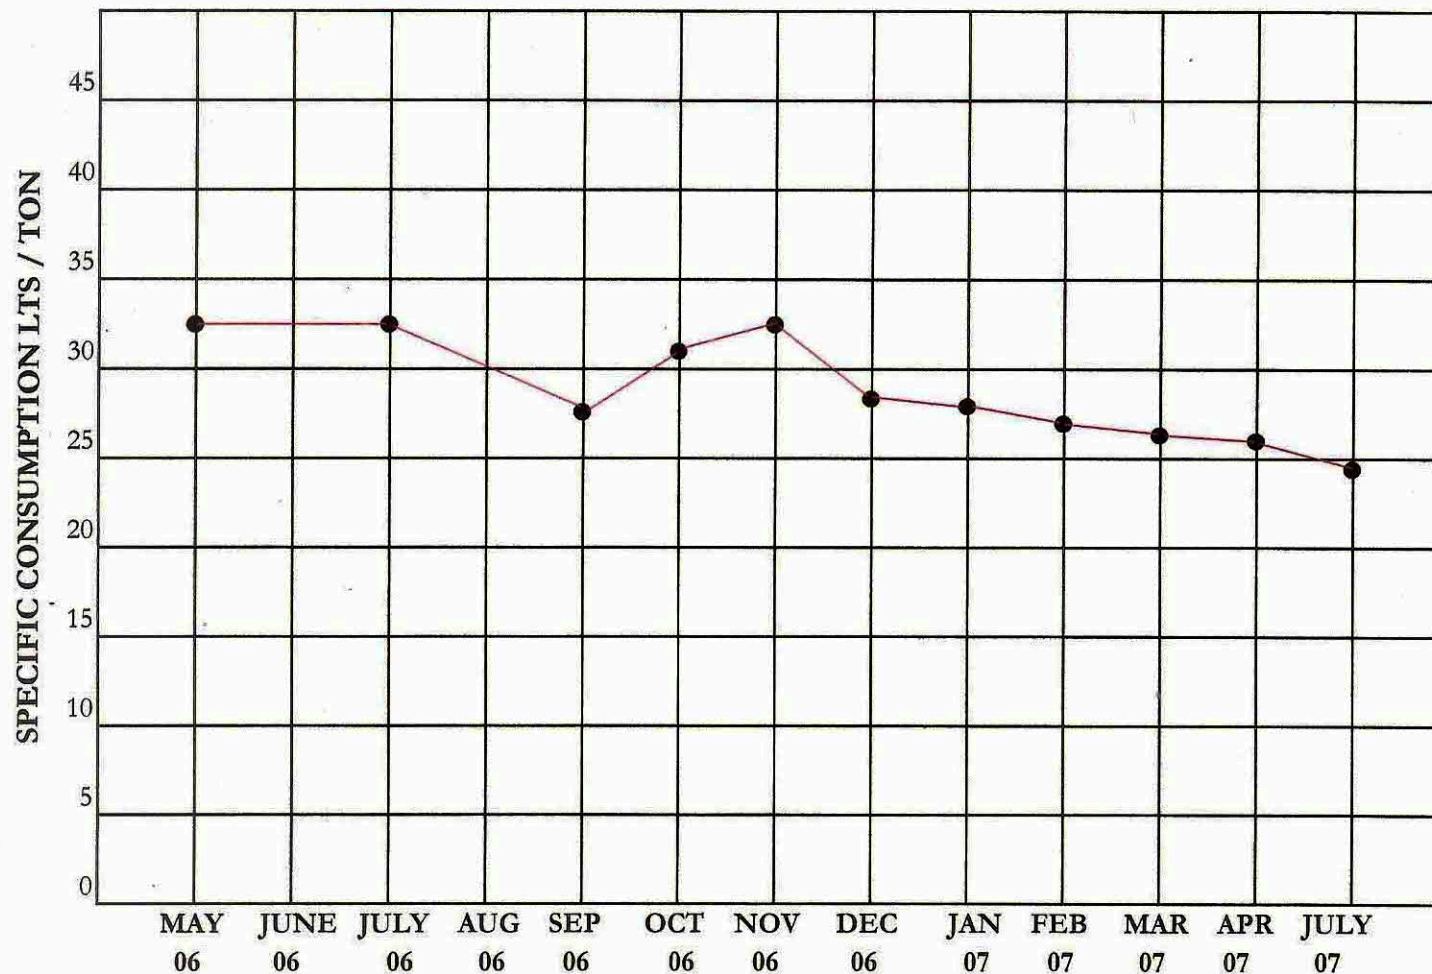

While going through the records of Diesel Consumption we are surprised to note that the specific Diesel consumption has considerably reduced from 30Lits/ton to 25Lits/Ton (30Lts of diesel consumption for processing 1ton of edible oil) as shown in the attached graphical sheet.

After having gained confidence on the reduction of diesel consumption, we procured another 4 Nos of GMX Magnetic Fluid Conditioner and fitted with other 2 Nos of Thermic Fluid Heaters. This equipment is found to be of really worthy and useful for saving the costly fuel, and there by the investment cost for the procurement of this equipment was retrieved by us with in 2 months.

Authorised Signatory.
